Professional Summary

A dependable web developer focused on turning ideas into fast, reliable, and easy-to-use products. I bring strong problem-solving skills, a fast learning curve, and the ability to take a project from planning through delivery with minimal supervision. I care about the details that make software actually usable — speed, clarity, and a smooth experience for the end user — and I work well with teams and clients to make sure what gets built matches what the business actually needs.

Technical Skills

Backend Development

- **PHP** (Advanced)
- **WordPress** (Custom Themes, Plugins, CPTs, ACF)
- REST API Integration
- **Databases:** MariaDB, PostgreSQL

Infrastructure & Tools

- **Docker & Linux** Server Administration
- **Git & GitHub** (Version Control)
- **AI-Assisted Development:** Opencode, Cursor (used to accelerate coding and debugging)
- Cloud Fundamentals (AWS Cloud Practitioner)

Frontend Development

- **Next.js** (App Router, API Routes, SSR, SSG)
- **React** (Hooks, Components, Lifecycle)
- **JavaScript (ES6+) & TypeScript**
- **Tailwind CSS** (Utility-first styling)
- **State Management:** Zustand
- **Data Fetching:** TanStack Query, Axios
- **Payment Integration:** Stripe API

Professional Experience
